

Cook Me Maybe

Add the app to your iPhone home screen in 4 steps

Adding Cook Me Maybe to your home screen makes it work like a real app. On iPhone it's also **required** for reminder notifications. It takes under a minute.

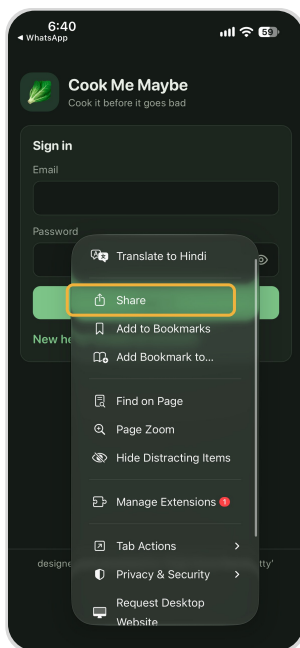

1

Open the link in Safari

Open **cook-me-maybe.vercel.app** in Safari. Tap the **menu button** (three lines) at the bottom, just left of the web address.

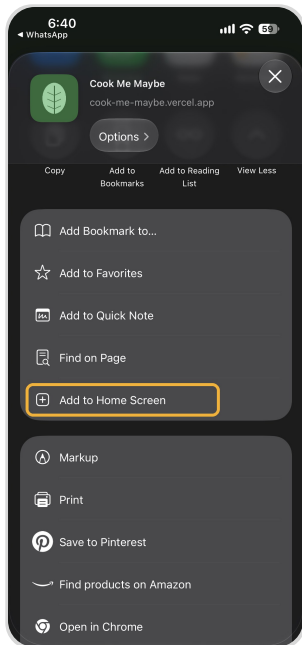

If the link opened inside WhatsApp or Instagram, first choose **Open in Safari**.

2

Tap Share

A menu pops up. Tap **Share**.

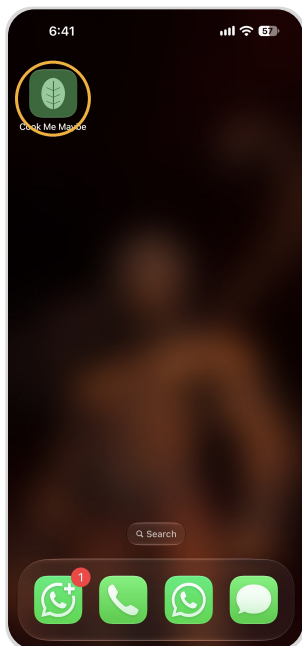

3

Tap “Add to Home Screen”

In the share sheet, scroll down and tap **Add to Home Screen**. On the next screen, tap **Add** in the top-right corner.

Don't see it? Scroll the list down, or tap **Edit Actions** at the very bottom to add it.

4

Open it from your home screen

The **Cook Me Maybe** leaf icon is now on your home screen. Always open the app from this icon, not from Safari.

Last step: turn on reminders

Sign up with your name, email and password. Then tap the **menu button** (three lines) at the top right, tap **Turn on notifications**, and choose **Allow**. You'll get a nudge every morning, starting 4 days before anything in your fridge goes bad.

On Android? Open the link in Chrome, tap the three-dot menu (top right), then **Install app** or **Add to Home screen**.
